Void-Fill Protective Packaging Solutions

As product packaging has grown to become a critically important part of your sales and marketing operations, so have internal protective packaging solutions. With online sales growing at a rate of 20% annually, packaging for mail delivery is now impacting your brand, as well as your shipping costs. Innovative protective packaging solutions can enhance your company's image with internal packaging that showcases your brand and demonstrates a commitment to environmentally responsible packaging, while minimizing the size and weight of the overall package for lower shipping costs.

Reduce Costs

AirPouch inflate-on-demand protective packaging yields a significant cost saving as compared to other types of void-fill, such as peanuts, foam or paper. Air pillows offer the lightest weight solution for protective packaging and are durable enough to provide excellent product protection in minimal space. AirPouch pre-formed pillows also come in a high-yield box that reduces shipping, storage and handling requirements.

- Reduce cube costs for shipping and storage
- Create the perfect fit inside the shipping package, minimizing dimensional weight charges
- Prevent shipping damage, reducing product losses and returns

Exclusive EZ-Tear Perforations

AirPouch patented EZ-Tear perforations enable quick and easy separation of the pillows, allowing packers to work more efficiently with less material waste. These unique perforations also create a fuller air pillow, lowering your cost per cubic foot and creating less weight per package.

Markets Served

AirPouch EZ-Tear air pillows are versatile, have many protective packaging uses, and are great for all void-fill applications, including:

- Mail order fulfillment
- Pharmaceutical fulfillment
- Third party logistics
- Contract packaging and fulfillment

Build Brand Equity

Impress your customers with void-fill packaging that is as clean and new as the products they receive in the mail. Inflatable protective packaging not only protects your product during shipping, it also gives you an opportunity for custom branding inside the box. AirPouch void-fill air pillows can be printed with your logo, design or custom graphics to increase brand awareness and preference.

Offer Sustainable Packaging

Consumers are rapidly becoming more conscientious about the amount of waste they generate and are driving the need for more sustainable packaging solutions. AirPouch inflatable void-fill uses less material than other types of protective packaging. Plus, our line of EarthAware recycled products shows your customers you care about the environment.

AirPouch Void-Fill Value

- EZ-Tear perforations improve efficiency with pillows that are easily separated for optimum packing size and speed
- Durable and puncture resistant pillows inflate on demand, saving valuable warehouse space
- High-yield, boxed material reduces changeover time
- Pillows are clean, dust-free and lightweight
- Printable pillows for branding
- AirPouch pillows are infinitely recyclable, and come in EarthAware recycled blends
- Always in-stock products available for easy ordering

AirPouch pillows offer superior seals and puncture resistance for durability and reliable air retention

AirPouch EZ-Tear Air Pillows Materials and Specifications

Specifications

- Available Sizes: 8", 10" and 12" widths
- Available Mil Thicknesses: 1.1, 1.54 and 2.0 mil
- Printing: Custom printing options available
- Unit of Measure: 5,000 linear feet (1.1 mil), 4,000 linear feet (1.5 mil) and 3,000 linear feet (2.0 mil) of material per box

Material Types

EarthAware Recycled EZ-Tear Pillows

- Industry leading 95% pre-consumer recycled content
- Stock printed with EarthAware logo for end-user awareness; custom printing available

DuraClear 2000 EZ-Tear Pillows

- Enhanced linear low-density polyethylene with superior durability and puncture resistance

Anti-Static EZ-Tear Pillows

- Amine Free
- Polycarbonate and silver solder compatible
- Dissipates static build-up and protects sensitive components
- Static Charge Dissipation: 5000v to <50v, <2.0 sec
- Surface Resistivity: $>1 \times 10^5 < 1 \times 10^{12}$ Ohms/in²
- Pink color for easy identification

Best Practices in Protective Packaging

Properly packing your products for shipping is critical to reducing damages and returns. With proper packaging methods and materials, you can ensure your products reach their destination in perfect condition. We manufacture a full line of AirPouch inflate-on-demand protective packaging products for a variety of uses, including:

- **Void-fill** – Limits movement that can cause damage
- **Wrapping** – Wrap delicate items to protect against vibration and shock during shipping and handling
- **Bracing** – Protect corners and edges that are the most vulnerable to damage

Use protective packaging products that are specifically intended for that use – To ensure products remain damage free, use protective packaging materials as instructed. An AirPouch specialist will help you determine the best products for your needs.

Use special packaging for special products – Items such as electronics and electrical components often require anti-static materials, such as our AirPouch **Anti-Static EZ-Tear Pillows**.

AirPouch pillows can protect your products several ways:
