- Automatic template infeed and optional automatic outfeed designed to shorten loading and unloading times and reduce labor input.
- Industry leading design, construction, features and customer support.

DESCRIPTION:

Starview's ASP Series skin packaging machines are designed for low to medium volume applications. ASP machines incorporate a stationary heating system with instant on/off heaters. ASP skin packaging machines have PLC timer control for precision repeatability and an accurate turbine regulator. An automatic in-feed table with traveling template loader, out-feed table and impulse type hot wire cut-off are all standard. A multi-stage vacuum system for complex parts is included as a part of the HMI. A film temperature sensor that overrides the PLC heat timer for consistent film heating is standard.

Starview's ASP skin packaging machines can be equipped with an optional automatic overhead out-feed system. The PLC can be used to advance an optional conveyor to remove finished skin packages from the work area.
